GENERAL SAFETY INSTRUCTIONS

It is important to read and understand your instruction manual and any label attached to the tool. Learn its application, as well as its limitations and the potential hazards associated with this power tool.

Earth all tools

- Where the tool is supplied with a 3 core cable. Always connect the green and yellow to the earth terminal never connect it to a live terminal.

Keep guards in position

- Always keep guards in position, in good working order, correctly adjusted and aligned. Never attempt to use a power tool without any guard supplied with it.

Remove adjusting keys

- Always check to see that keys and adjusting wrenches are removed from power tool before turning on.

Clean work area

- Accidents occur where benches and work areas are cluttered or dirty, floors must be kept clear, avoid working where the floor is slippery due to sawdust or wax.

Dangerous environment

- Do not use power tools in damp or wet conditions, or expose them to rain. Provide adequate surrounding work space and keep area well lit.

Children

- Children should always be kept at a safe distance from your work. Make your workshop child-proof. Lock tools away where children can not get access to them.

Do not use excess force.

- Your power tool will give you much better service if you do not use excessive force when using it.

Use the correct power tool

- Do not force, or attempt to use a power tool for a purpose it was not designed for.

Wear correct clothing

- Do not wear loose clothing, neckties or jewellery or other items which may get caught in moving parts. Wear non-slip footwear, cover or tie back long hair, roll long sleeves above the elbow.

Protect your head

- Wear safety goggles at all times, every day glasses are not sufficient for eye protection, as lenses are not impact resistant and could shatter. Use face or dust mask if operation is likely to be dusty and ear protectors during extended periods of operation.

Secure work

- Always secure work where practical, use a clamp or vice, it will allow you to use both hands to operate your power tool.

Keep your balance

- Do not over reach, keep proper footing at all times to ensure correct balance.

Maintain your tool

- Keep your tool in good working order, keep tools sharp and clean for best and safest performance. Follow instructions for changing accessories and lubrication.

Accessories

- Follow the instructions that accompany the accessories. The use of improper accessories could be dangerous.

Never stand on your power tool

- Standing on your power tool or its stand could cause serious injury if the tool is tipped or if the cutting tool is accidentally contacted. Do not store materials above or near the tool so that it is necessary to stand on the tool or its stand to reach them.

Check damaged parts

- If any part of the tool is damaged, before further use, check carefully that it will operate properly and perform its intended operation. Check alignment of moving parts for binding. Any guard or other part that is damaged should be correctly repaired or replaced.

Product Familiarisation

Expert Folding Ear Muffs

USER INFORMATION

Operating Instructions

- Position ear muff headband directly over the head, pull the cups outward and position over your ears so that they fully enclosed the ear and seal tightly against the head.
- Adjust headband to reduce the space between head and band.
- For best results, remove all hair, and other objects, from under the cushions. The entire cushion surface should press firmly, but comfortably, against your head.
- Ear muffs, and their cushions, may deteriorate with use and should be examined for cracking or other deformations. Replace as necessary.

Maintenance

- Wash with mild soapy water. The foam liner should be completely dry before reinserting into the cups.
- Store in cool dry storage.

SPECIFICATION

Attenuation values (Ear muff worn over the head)

Frequency Hz	125	250	500	1000	2000	4000	8000

Tested according to EN352-1:2002							

EN ISO 4869-2 HML value: H=34 M=31 L=24

EN ISO 4869-2 SNR-value: SNR 33dB

WARNING

- Improper fit of this device will reduce its effectiveness to reduce noise levels.
- Follow these instructions for proper fit.
- Ear Muffs can be recommended for protection against the harmful effects of impulsive noise. The Standard Noise Reduction (SNR) is based on the attenuation of continuous noise and may not be an accurate indicator of the protection attainable against impulsive noise such as gunfire. Constant or repetitive exposure to impulsive noise may lead to serious injury, temporary or permanent deafness.
- These ear muffs, whilst designed to protect ears from injury, do not provide unlimited protection.
- Do not alter or modify in any way.
